

Be Green Scavenger Hunt

Use online search engines to research green materials for building bridges.

Ages: All ages

Time: 30 minutes

Materials Needed:

Computers with Internet (have them share to practice teamwork), list of approved search engines

Instructions:

1. Have members each use an approved search engine to research materials used for bridge building in order to create a list of “green” building materials. Have members collect the name of the material, what makes it a green material and how much it costs
2. Have members discuss what materials from this list they could mimic in constructing a mini bridge (plastic, wood, etc.) At a large table have all supplies ready for members.
